

Divar MR series Digital Video Recorder

- ▶ **Cost effective, secure embedded design**
- ▶ **Efficient MPEG-4 file compression**
- ▶ **View and record video in CIF, 2CIF, or 4CIF resolution**
- ▶ **Bosch and third-party PTZ dome control**
- ▶ **Export to USB or optional DVD writer**

The Divar MR digital versatile recorder gives you a compact and convenient CCTV management solution in an all-in-one embedded unit. It provides high-quality digital recording on up to 16 channels, with an internal storage capacity of up to 2 TB. The Divar MR boasts exceptional video quality and a high level of advanced functionality. Ease-of-use and versatility feature highly in its design, giving you trouble-free recording and management.

Functions

The Divar MR offers high-quality, real-time digital recording on up to 16 channels. You can view and control cameras, handle alarms and check device status all through one convenient interface. In addition, the Divar MR offers:

- Improved clarity for better recognition on recorded video
- Longer recording time
- An extended range of features
- Multiple interfacing options
- Powerful search functions
- Synchronous audio
- Remote configuration and management
- Low maintenance requirements
- Lower total cost of ownership

Image quality

The image quality of the Divar MR is excellent. Highly efficient MPEG-4 compression significantly reduces bandwidth and storage requirements compared to JPEG and wavelet technologies. You can store more detail and extend retention periods while reducing overall storage costs. The Divar provides real-time recording in CIF resolution on all channels simultaneously. For applications where even greater clarity is needed, you can use 4CIF to capture more detail in every scene.

Multiple control methods

A variety of control methods contribute to an outstanding system with a high degree of operational flexibility. Bosch's IntuiKey keyboard places easy-to-use system control at your fingertips. Alternatively, use the Divar MR's front panel control buttons and jog dial, IR remote control, or a standard mouse for quick access to the system.

In addition to these control options, you can use the intuitive PC-based Divar MR Control Center software to easily manage multiple Divar MRs in your surveillance system. The Divar MR Control Center provides complete remote management including live viewing and control, playback, configuration, and remote alarm notification. With the Control Center, all operation and control can be centralized to create a highly scalable video management solution.
